For example, it shall be possible to have customizable stops and locations including door-to-door, curb-to-curb, origin-to-destination, and/or customer redirect to designated stop location.
4. Map data, such as addresses, should be automatically updated with the option of manual intervention.

configure a zone as door-to-door during certain hours and origin-to-destination during other times.

6. Service and zone additions should be done in a window that allows you to see all existing services directly on the map.
7. Service zone boundaries shall be changeable from within the web application, and not require interacting with the software vendor to complete the changes of the service and shapes.
8. The system shall have the ability to configure service and zone-level configurations as needed by operator staff without being required to interact with the software vendor to do so.
9. The system shall allow entry of client first name, last name, and middle initial. When entering data, the system shall utilize search, pop-ups or other appropriate techniques to detect and alert the user if there may already be a client database entry under this name.
10. The platform will allow dispatchers to search any field such as ID numbers, Date of Birth, address, etc. to locate and identify a client profile.
11. The system shall allow the customized entry of client's data with additional fields according to the needs of the agency.
12. The system shall allow multiple address entries for common client pick-up locations, drop-off locations, or other favorite locations.
13. The system shall require entry in a field specifying for accessibility features that will be needed on the ride.
14. The system shall support trip booking while a booking clerk is on the phone with the client.
15. The system shall support booking for both pre-scheduled and on-demand trips.
16. The ability to book pre-scheduled trips shall be configurable to turn on or off.
17. The system should allow for demand forecasting to be able to see what amount of demand you will have based on scheduled and recurring trips in the system at a future date to allow schedulers to better understand their client demand and how many vehicles they need.
18. The system shall permit trip booking times within prescribed scheduling windows.
19. The system shall accommodate return trips and should also be able to implement minimum hold-over times (or passenger dwell times) for scheduled trip returns if programmed accordingly.
20. The system shall allow notes to be attached to any phone booking (e.g. indicating details on pick-up/drop-off location, or any other relevant information). This information should be visible to the driver during pickup.
21. The system shall permit the booking agent to retrieve the client record by entering the client's first or last name, telephone number, or other forms of client level identification. For client retrieval by last name a list box shall be used to list all clients with name beginning with the characters entered.
22. The system shall allow for leave-at and arrive-by trip bookings, so that passengers can specify either the time they would like to leave someplace at, or arrive somewhere by, giving passengers more control over their days and time.
23. The system shall be able to show various services that the specific passenger will have access to. This could mean that a passenger could see a paratransit service, a pooled (shared ride) Microtransit service, and an NEMT service all within the app, and as long as they have the ability and eligibility to use that service, they

would be able to choose the specific service that they want to use that day. The system shall also allow rides to be shared by multiple client types.

24. The system shall allow the booking clerk to edit the number of travelers per booking.
25. During each trip booking, the system shall display the map locations for the pick-up and drop-off.
26. Once all other trip booking information has been entered, the system shall indicate to the booking clerk any applicable fare(s) to be paid by the client, attendant, and any companions.
27. The system shall be capable of accepting trip bookings up to a certain number of (admin defined) days in advance. This limit shall be configurable.
28. The system shall allow the definition of recurring-trip bookings (subscription trips), with flexible options to specify exceptions. At minimum, the system shall support selection of a recurring weekly day (e.g., every Tuesday), a recurring monthly day (e.g., every 2nd Wednesday), a recurring monthly date (e.g., the 4th of every month), and recurring weekly days (e.g., every Tuesday and Friday).
29. The system shall allow the booking clerk to temporarily suspend a particular recurring-trip booking (subscription trips) and provide exclusion dates for the recurring trips.
30. The system shall allow the agency to designate trips to a third-party contractor (e.g. taxis or other TNC). This dispatching should be done automatically and based on service criteria and business rules.
31. The system shall allow the agency to differentiate fleet types between dedicated vehicles and non-dedicated vehicles.
32. The system shall have automation in trip brokering based on an intelligent algorithm that will allow for dispatching to multiple dedicated fleets, and also to contracted non-dedicated TNCs in cases of overage in demand. Fleet priorities may be set by the agency.
33. The system shall enable automated brokering for each day, taking into consideration the recurring trip bookings and scheduled trips. The system shall optimize for the highest shared-ride ridership, the least distance traveled, and/or the least travel time, based on actual mapping and GIS data stored in the system.
34. The system should allow for on-demand trips to be booked through the mobile app or by calling into the agency's call center. If it is the first time they have used the service, the scheduler and the app should be able to create a profile within the same window.
35. The system should be able to combine (commingle) different demand-response transportation services into one or more fleets, so that, for example, Microtransit customers can also be put on ADA/paratransit vehicles.
36. Solutions provider shall demonstrate the ability to plan, book, and pay for travel across different modes and online platforms.
37. When services are pooled and/or commingled, the service should automatically broker this functionality. The Administrator should have the capability to change the criteria around how efficient the system is, (for example, how important short trips and passenger experience is), and define the service to fit their specific requirements around public service offerings.
38. When commingling, the service must be able to have specific criteria for flexibility around the ETA approximated to adjust how flexible the system can be when scheduling passenger pickups. For example, if picking up a Demand Response passenger (Microtransit) would cause a special needs passenger (ADA/paratransit) to miss their ETA beyond the point of the flexibility allotted, then that Demand Response passenger should not be picked up first, but rather they should wait for the next vehicle. This should all be

automatic so not to jeopardize the criteria of multiple services that are being offered.

39. The system shall automatically produce a driver schedule for each operator run, indicating the driver pickup and drop off. Any trips that come in during these runs should be added to the driving schedule according to the algorithm criteria. Notification of changes to a driver's manifest should be immediate. In instances where pooling/shared rides are allowed, it should occur automatically.

40. Passenger requests shall have several options to indicate each pick-up and drop-off, including the street address, point of interest and name of stop, as well as times for pickup and drop-off.

41. The ride requests shall be transmitted to the Driver app in their assigned vehicle using the mobile data communications system. Once a driver has logged in to that mobile device, the manifest will be automatically updated.

42. Adjustments (i.e., for insertions, changes, cancellations, or no-shows) during vehicle operation shall be immediately transmitted to and from vehicles using the mobile data communications system.

43. The central dispatching/monitoring system shall display the most recently reported location of all vehicles on the map in real-time.

44. The map display shall provide the following information via vehicle icon shape, color coding, and/or overlays:

- Network connection status;
- Fleet;
- Service state (e.g. in-service, not in service);
- On-time state (e.g. running behind schedule, slack time)

45. The map display for dispatchers shall provide more information about any vehicle via the icon text and an available popup window when clicked over the icon. Such information shall include at a minimum:

- Vehicle Number;
- Operator;
- Driver;
- Logon status;
- Upcoming Pick-up/Drop-off location (or a list of next events);
- Trip and passenger information;
- Current speed

46. The central dispatch/monitoring system shall present a tabular display that presents the schedule times for events currently assigned to each vehicle.

47. The system shall allow historical trip information to be reviewed by the agency.

48. The system shall allow all logged data to be retrieved, even if it has been archived.

49. The historical map shall provide replay controls to view the entire sequence of reported locations from the beginning of the time period through the sequence of events.

50. The system shall allow selection of any time period for access to the historical data.

51. All system data shall be owned by the agency, with the rights and ability to access all data, export it

to other applications, and allow access to third parties for integration purposes on a perpetual royalty-free basis.

52. The platform shall be a cloud-based MaaS platform with no specialized hardware/infrastructure from the agency unless approved in advance with cost being absorbed by the software vendor.

53. Continuous optimization - The system shall continuously optimize by moving trips (if required) so driver manifests are updated in real time, and trips may be moved between vehicles for maximum efficiency when conditions change. Trips must also be able to manually be moved and altered to make up for the dispatching system's shortcomings. The system must be able to compensate for trip cancellation when a driver is already in-route so that unrealistic pickup times aren't possible.

54. Trip brokering: System can seamlessly allocate trips to TNCs, taxi companies, and/or ride hailing operations with varying priorities so trips are allocated in special conditions to non-dedicated vehicles.

55. Trip brokering: All trips to dedicated or non-dedicated vehicles are recorded and tracked for reporting purposes. It shall further separate and track costs from different fare-media and service type and pull all data necessary to fulfill applicable Federal Reporting Requirements such as (but not limited to) the National Transit Database (NTD) and the Texas Department of Transportation (TxDOT) PTN-128 requirements.

56. Trip brokering: Trips should flow seamlessly to third-party fleets, including TNCs and taxis, based on time rules set by the agency in order to avoid overloading the system.

57. Automatic alerts should inform staff about driver overtime, stranded riders, excessive ride length, late pickups and/or drop-offs, and any other issues that need to be addressed operationally in a timely fashion.

58. Custom fields should be available for rider data capture.

59. Custom fields should be available in trip request and shall be able to be used for reporting purposes.

60. Onboard driver-facing electronics should have the capability to capture signatures from client types that require them.

61. The platform shall be able to dynamically assign driver breaks that consider company policy, labor rules and trip pattern.

62. For NEMT reasons, the platform must allow for manual assignment of trips. It should also allow tracking of the reason for such changes through the recording of comments and/or notes attached to the trip log.

63. The software shall be able to predict On-Time Performance prior to the date of service as well as throughout the day.

64. The software shall automatically adjust trips so they are close to the originally scheduled time when cancellations occur.

65. It is preferred (but not necessarily required) that any telecommunication devices utilize "FirstNet" as the communication provider company. 791 COOP currently contracts with FirstNet who provides high priority mobile connectivity equivalent to that of First Responders (such as Law Enforcement, Fire Department and EMT Services). Contractor must provide evidence that the selected service provider is able to operate in remote areas in rural counties.

66. It is preferred (but not necessarily required) that any platform software be compatible with Dallas Area Rapid Transit's (DART) "Go Pass" mobile app. 791 COOP prefers GoPass due to its growing usage

throughout Texas and for its high-quality experience for users and for its advanced reporting capabilities. If a contractor intends to propose an app other than GoPass, they must provide evidence that the selected mobility app provides an experience equivalent to or greater than that of GoPass.

67. The selected platform-as-a-service vendor shall assist with Title VI analysis, public hearings, board meetings regarding service design, and appropriate marketing and stakeholder consulting for 791 COOP's members counties and urban cities.

VI. PRICING FORMAT

A. Pricing for Line Items or Catalog

It is the intention of 791COOP to establish an agreement to furnish and/or deliver all goods and services provided by awarded vendors to its participants. Proposers are requested to submit a proposal for offering their complete and total line of available products and services to governmental entities, including school districts.

If a name brand is mentioned in the specifications, proposals on any reputable manufacturer's regularly produced equipment of such items of a similar nature or similarly used and substantially equivalent will be considered.

The list or category of goods or services sought by this solicitation is inclusive and not exclusive. There may be other similarly used items that are sold by the responding vendors that may be included as part of the proposing vendor's "catalog" (defined below) now or during the life of the agreement that is considered included in this solicitation and subject to the minimum discount proposed. Pricing may also exclusively be line-item pricing or, and recommended, in combination with a minimum catalog discount.

Example: During the life of the agreement, models change, and new products come to market that is in the same category and are added to the vendor's "catalog" and are available for purchase by users of the agreement. If you fail to propose a minimum discount on your catalog, it may limit the ability to change the pricing of catalog items

and services during the life of the award.

Definition of “catalog”

"Catalog" means the available list of tangible personal property or services, in the most current listing, regardless of date, during the life of the contract that takes the form of a catalog, price list, schedule, shelf price or another form that:

1. is regularly maintained by the manufacturer or vendor of an item; and
2. is either published or otherwise available for inspection by a customer during the purchase process;
3. to which the minimum discount proposed by the proposing vendor maybe applied.

Adding New or Replacement Goods Items; During the Life of the Agreement, it is easiest proposing a Minimum Discount off (PREFERRED MODEL) catalog prices for goods or a markup on the vendor's cost of a good item.

Markup on cost

It is NOT recommended proposers use the Markup pricing method because many participants are not allowed to use a bid with a markup pricing method, specifically when using Federal Grant Funds. Using this pricing method may limit the effectiveness of your award.

If you choose to use the markup pricing method:

When proposing a markup on cost model, the vendor shall be required to provide proof of actual cost to the vendor of the goods sold to verify pricing markup is properly and legally applied for the sale of the goods.

NEW ITEMS: 791COOP will allow the addition of new goods items to be added to the agreement when they become available to the market through the vendor under the discount off the published pricing model or markup on cost model. You must stipulate a discount or markup on catalog price in the appropriate section of the pricing Excel sheet to be eligible for this option. You may stipulate a discount off specific brands or lines of goods if you desire. Be thorough and concise. Any items added must be available to all customers, within legal or contractual limitations, if any. (Example: Apple products are not permitted to be sold to the education market without special agreement from Apple but may be sold to other government customers.)

REPLACEMENT OF DISCONTINUED OR LIMITED AVAILABILITY ITEMS: **When proposing a Line Item pricing model -** 791COOP will allow replacement items to the original list item if it is no longer manufactured or is available in limited quantities. Limited availability must be documented by a letter from the manufacturer. Vendor may replace it with an item of like kind and quality and the price will remain the same as proposed, except if it is cheaper, vendor shall lower the price accordingly and if it is more expensive due to the vendor's actual cost from the manufacturer, it will be priced and the same discount shall apply as the item it replaces. Vendor shall be required to prove the pricing if the cost is higher than the original core list price to the customer.

Note: If you propose a minimum Discount off catalog, you avoid this process since you are adding an item to your catalog and list price and the proposed minimum discount off catalog would apply to the new item.

Shipping cost: Pricing presented for goods offered should not include shipping costs from dealer to Participant customer. IF shipping is included in the price regardless of the situation, then you simply state no additional cost for shipping or delivery to any customer. Example: if you sell a vehicle and it includes delivery but the sale of vehicle parts does not, then be sure to specify the variations in your pricing. Shipping method

is determined by the vendor and the Participant/Customer at the time of the quote/purchase by the Participant/Customer and satisfactory shipping methods and costs are agreed at that time. Shipping should be passed through by the Vendor at actual cost to the 791COOP Participant.

B. Discussion of Pricing Options

Proposals on any reputable manufacturers regularly produced goods falling within the general categories solicited herein will be considered for award. If a name brand is mentioned, it is only to illustrate type and quality and is not intended to restrict competition. Any list included herein is inclusive and not exclusive. There may be other similarly used items that are sold by the responding vendors that may be included as part of the proposing vendor's "catalog" (Defined above) now or during the life of the contract that are considered included in this RFP. Example: During the life of the contract, models change, and new products come to market that are in the same category and are added to the vendor's "catalog" and are available for purchase by users of the contract provided the catalog discount or cost markup proposed is honored by the awarded vendor.

791COOP leaves it to the proposer to determine what goods or services that perform or serve this function and the proposer may list or include anything applicable. This includes a multitude of various Facility Maintenance related services. Vendors may submit for one specific trade or multiple trades. Vendor may submit for the trades listed in this RFP or other related trades not listed. Response submittals will be evaluated by 791 Purchasing Cooperative.

A discount off list price pricing model is ideal as list prices change over the life of the awarded agreement. Possible pricing models are discussed in this document. Any other goods and services that are logically related to this general category should be included. 791COOP reserves the sole right to determine whether or not proposed goods or services are logically related to this general category.

Bidder should list all related services, installation, repair, maintenance, travel, lodging, per diem, and hourly fees or other defined and specified unit cost according to category offered on this contract. No inappropriate offerings will be considered.

The Contractor shall furnish all necessary labor, materials, tools, supplies, equipment, transportation, supervision, management and shall perform all operations necessary and required for services. All work shall be performed in accordance with the requirements set forth in the resulting contract and each mutually agreed upon work request or purchase order issued by 791COOP participating participants.

Since the list of items a vendor may carry is potentially very long, and items are removed and added to the market frequently, it may be more advantageous to propose a minimum discount off your catalog for goods and services. You may offer different discounts for different brands or lines or services of goods if you choose.

A zero discount off catalog proposal is permitted, but 791COOP encourage vendors to propose the best discount they feel is necessary to compete with other retailers to provide the greatest benefit to 791COOP participants.

Please propose a minimum discount off the catalog for all non-line items proposed so you will be covered when future items are available in your catalog. By doing this, the price is a ceiling and not a floor. You may always lower your price or increase your minimum discount percentage to be more competitive in a particular situation.

You may propose all goods as a line-item list if you prefer but the PREFERRED proposal method is a minimum

discount off catalog prices. You may propose, both discount off a catalog AND line-item pricing for specific lists of items if you choose to.

Caution: Using the Markup method of pricing may exclude some participants when using Federal funds as Federal regulations prohibit this type of pricing and some local regulations prohibit this type of pricing, and it always requires the proposer to make available to 791COOP or its participants proof of the cost of the item to the proposer to verify the markup is applied according to the terms of this solicitation and resulting award.

You may stipulate different discounts off on specific brands or lines of goods if you desire.

Escalation Include annual price escalation not to exceed percentage. We highly recommend anchoring a commonly known price index such as the CPI or common trade publication index. If goods or service components face market exposure include this in your submission.

Service Incidental to the Sale of Goods

Many times, the sale of goods may be accompanied by the installation or set up of said goods. Proposers may submit pricing for the services in a Pricing Sheet spreadsheet as an attachment.

Any and All SERVICES may be proposed, but must be priced either as a line item or as a discount off the published Catalog price for said services. You may provide a catalog of services or a link to the available services or you may create a 791COOP-specific Catalog list of services with applicable pricing. Please specify or illustrate your chosen method.

If LINE ITEM GOODS pricing is proposed, then during the life of the award, prices may be increased only commensurate, dollar for dollar as your cost for the item increases. To increase the price of line item priced goods, vendor may be required to submit proof from the manufacturer or distributor that the pricing has increased and by how much.

NOTE: FAILURE TO PROPOSE SERVICES SHALL EXCLUDE THEM FROM YOUR OFFERING THROUGH THIS AWARD. THUS, PLEASE INCLUDE THEM IN SOME CALCULABLE WAY. YOU MAY PROVIDE A PERCENTAGE DISCOUNT OFF POSTED PRICES OR CATALOG PRICES FOR THE LOCATION OF THE STORE OR IN SOME SPECIFIC MANNER THAT FITS YOUR BUSINESS MODEL.

When using line item pricing, vendor should provide a pricing template with a maximum price increase percentage for annually for renewal years.

Optional Pricing Forms

Please provide a labor Wage Classification with labor rates for each type of work, Vendor proposes to use under this RFP.

VII. GENERAL INSTRUCTIONS

791COOP reserves the right to waive any informality and/or reject any or all proposals.

All responses should be direct, concise, complete, and unambiguous. With regard to those items that cannot be answered in the affirmative, clearly explain the precise portion to which you disagree and why you disagree. B. Notification to FTA; Flow Down Requirement

If a current or prospective legal matter that may affect the Federal Government emerges, the Recipient must promptly notify the FTA Chief Counsel and FTA Regional Counsel for the Region in which the Recipient is located. The Recipient must include a similar notification requirement in its Third-Party Agreements and must require each Third-Party Participant to include an equivalent provision in its sub-agreements at every tier, for any agreement that is a “covered transaction” according to 2 C.F.R. §§ 180.220 and 1200.220.

This responsibility occurs whether the Project is subject to this Agreement or another agreement between the Recipient and FTA, or an agreement involving a principal, officer, employee, agent, or Third-Party Participant of the Recipient. It also applies to subcontractors at any tier. Knowledge, as used in this paragraph, includes, but is not limited to, knowledge of a criminal or civil investigation by a Federal, state, or local law enforcement or other investigative agency, a criminal indictment or civil complaint, or probable cause that could support a criminal indictment, or any other credible information in the possession of the Recipient. In this paragraph, “promptly” means to refer information without delay and without change. This notification provision applies to all divisions of the Recipient, including divisions tasked with law enforcement or investigatory functions.

C. Federal Interest in Recovery

The Federal Government retains the right to a proportionate share of any proceeds recovered from any third party, based on the percentage of the federal share for the Underlying Agreement. Notwithstanding the preceding sentence, the Recipient may return all liquidated damages it receives to its Award Budget for its Underlying Agreement rather than return the federal share of those liquidated damages to the Federal Government, provided that the Recipient receives FTA's prior written concurrence.
